

Assessing the implementation success of the French bioeconomy Strategy

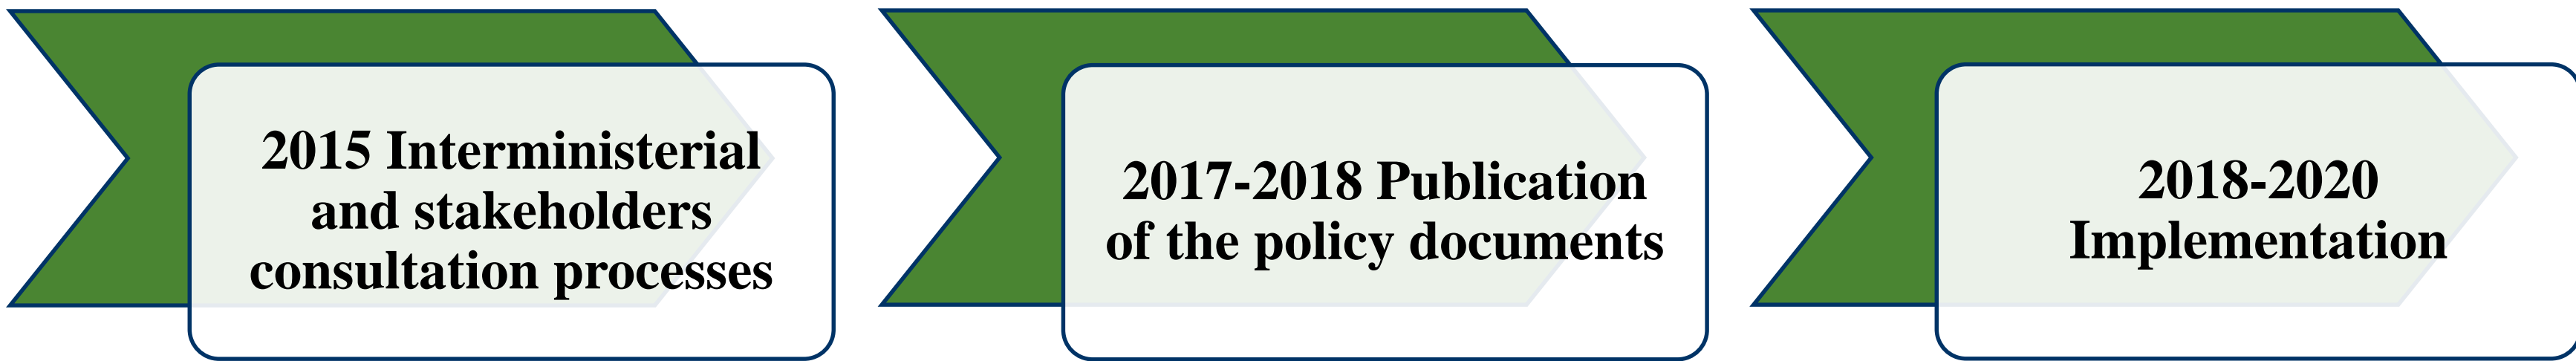

Adrien Ludot, PhD Candidate - Agricultural and Food Policy Group, Thae-Institute

I. RESEARCH QUESTIONS

- Was the implementation of the French bioeconomy Strategy successful?
- Which factors influenced the implementation of the French bioeconomy Strategy ?

II. HISTORY OF THE POLICY

III. ASSESSMENT OF IMPLEMENTATION

- Implementation success** = success in establishing the policy instruments (outputs)
- target** = measurable micro-objective of the instrument (e.g. publish a report, fund a project, enact a regulation...)

Evaluation of the implementation	Implementation success	Partial implementation success	Implementation failure	Total
Type of policy instrument				
Informational	8	4	4	16
Regulative	0	0	1	1
Economic	1	0	0	1
Cooperative	0	2	2	4
Administrative	2	0	0	2
Total	11	6	7	24

Table 1: Assessment of the implementation of the success and failure of the implementation of the French bioeconomy strategy policy instruments

- Implementation successes of the strategy:** simple implementation structure; no agreements on complex/uncertain topics between different administration needed
- Implementation failures of the strategy:** instruments at the heart of the scientific complexity of the issue + complex implementation structure; simple IS but no political support and understaffing

IV. INFLUENCING FACTORS

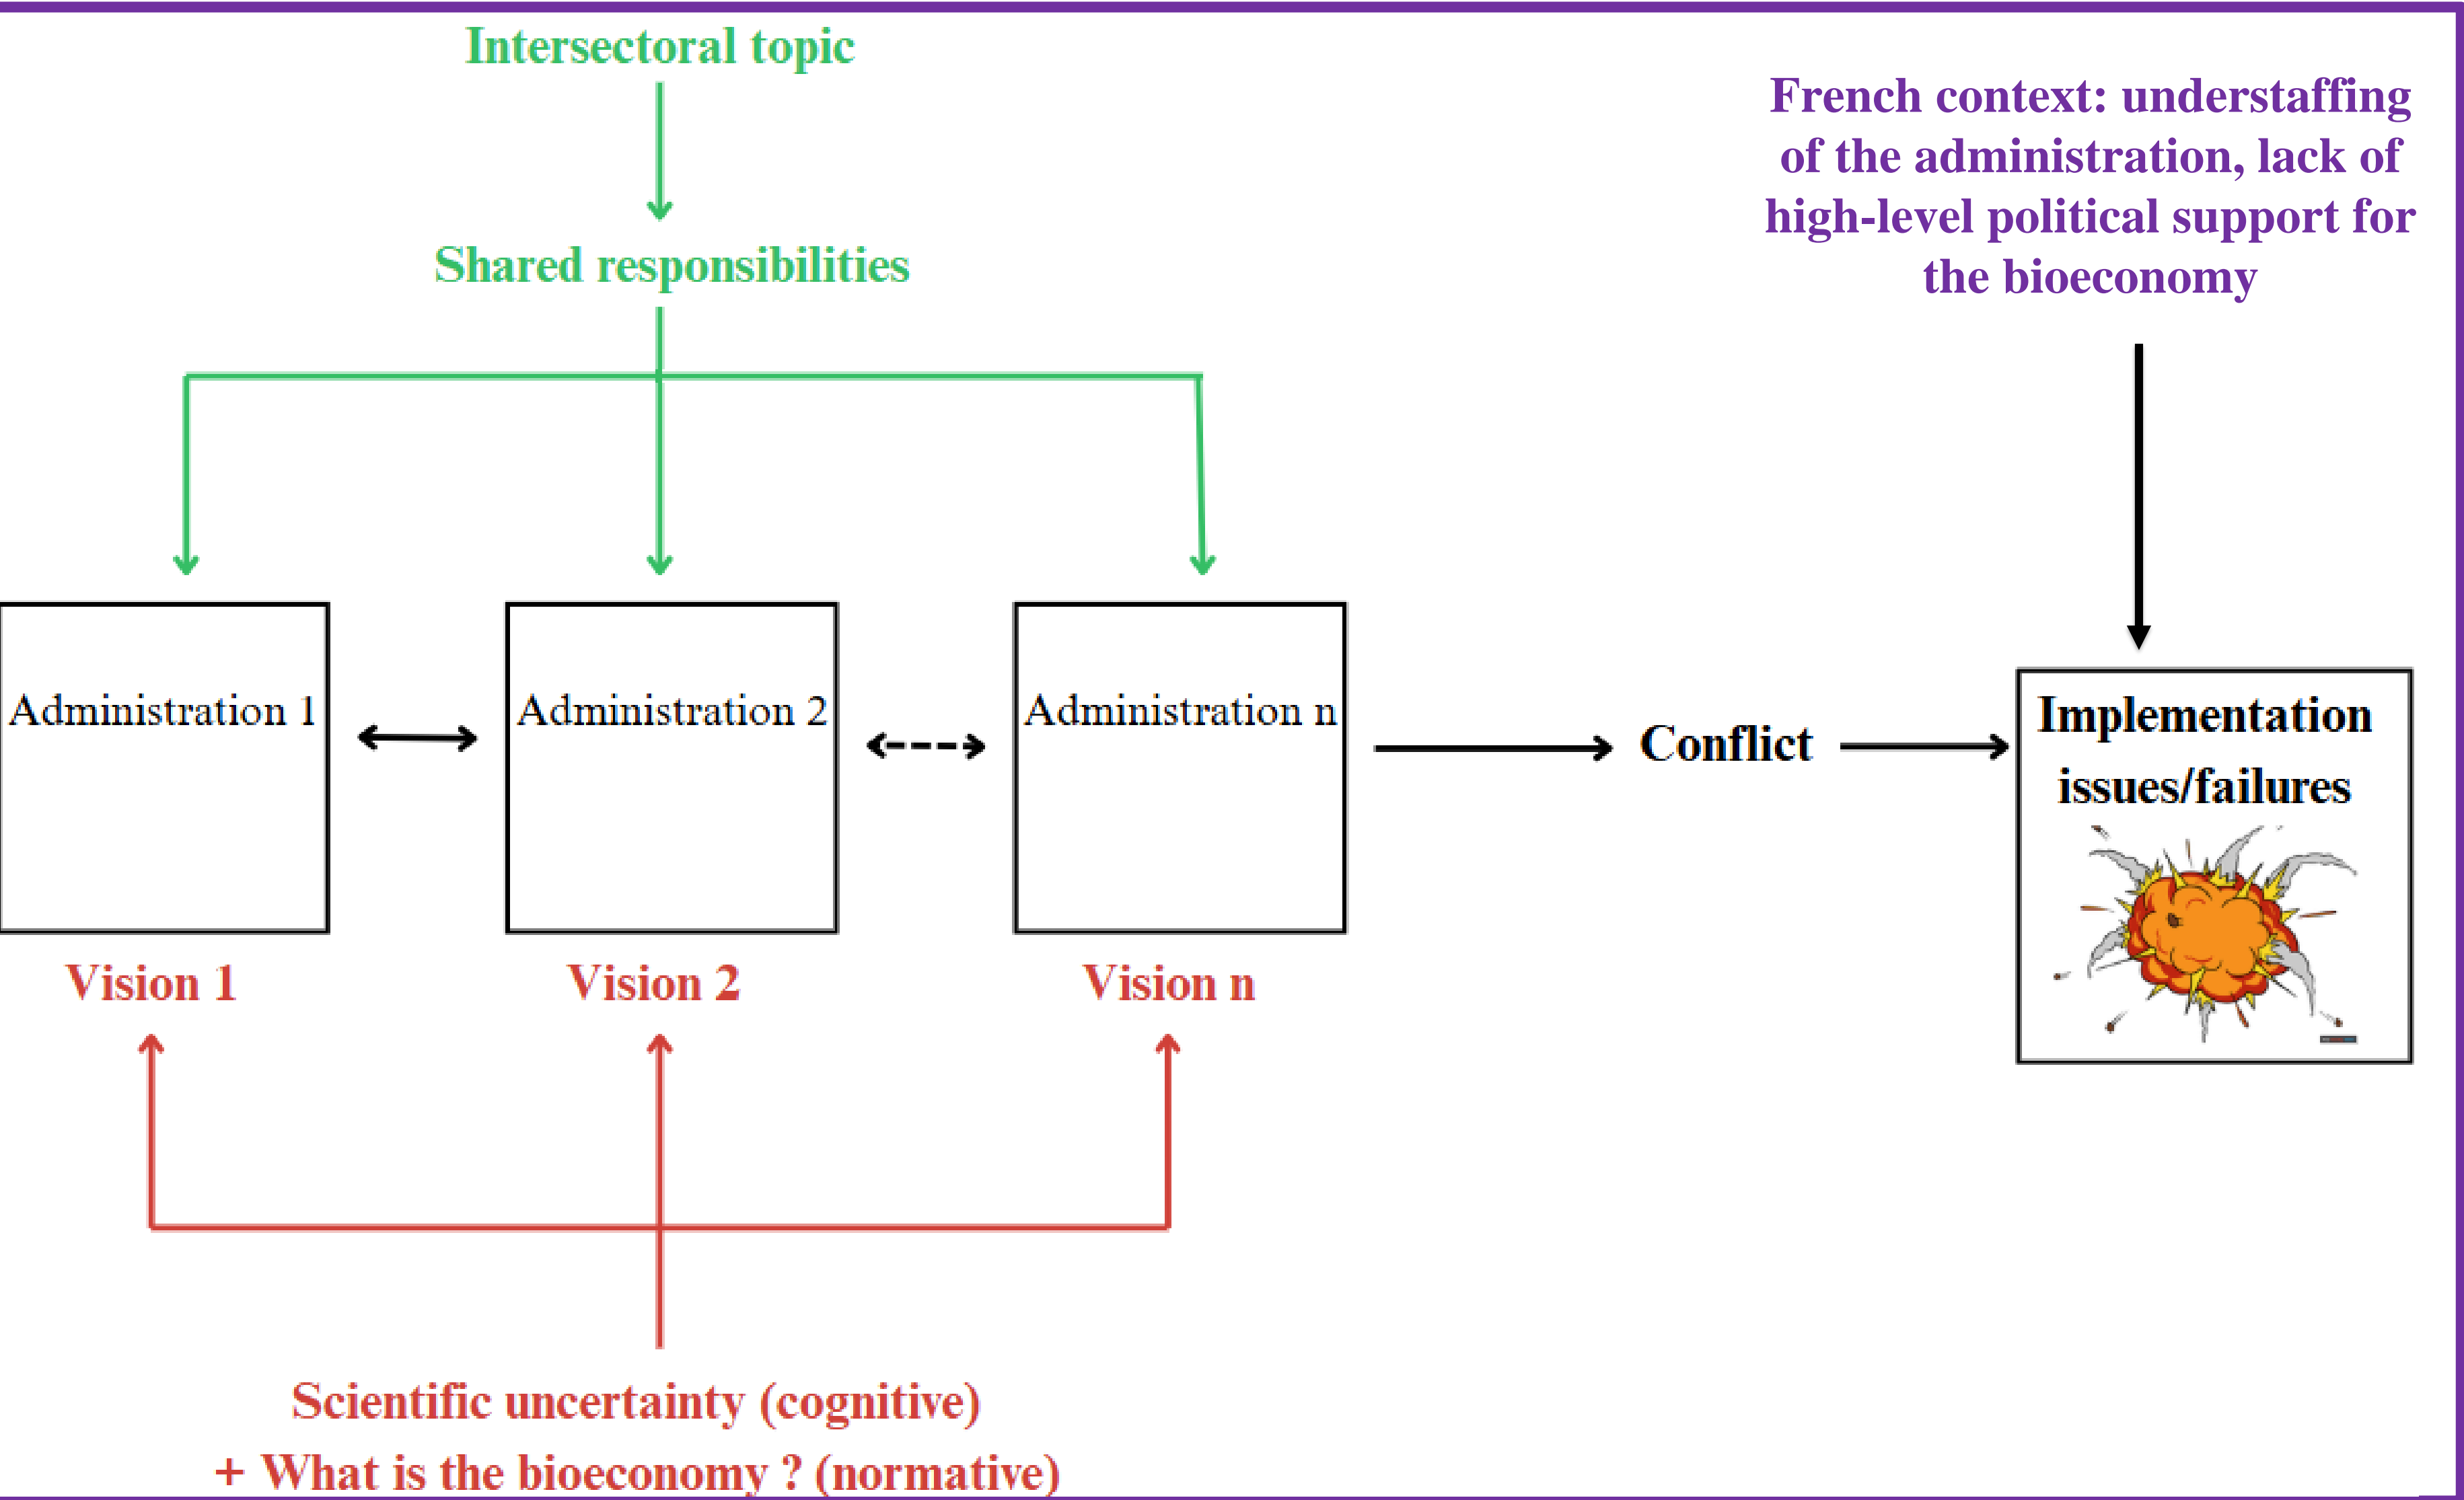

Figure 1. Factors negatively impacting the implementation of the French bioeconomy strategy

V. NEXT STEPS

- In-depth analysis of the data through a statistical analysis
- Additional semi-structured interviews
