

The Resource Economics Group, Faculty of Life Sciences, Humboldt-Universität zu Berlin will soon announce a job offer for a

Scientist (66%, TV-L E13) for research on
Fossil Resources and Climate Policy
for 31 months.

The successful applicant will be a highly motivated, excellent economist or modeller (e.g. physicist or mathematician). The person is willing and able to contribute to research in an interdisciplinary team in the project “Fossil resource markets and climate policy: stranded assets, expectations and the political economy of climate change”.

Requirements:

- An excellent degree
- Skills in either game theory or simulation
- Proficiency in English and satisfactory German
- Interest in economic research on sustainability issues

A plus would be:

- Knowledge of and interest in fossil resources and climate policy
- Familiarity with the concept of path dependence
- Interest to combine quantitative with qualitative methods
- Track record as a strong team player

We offer scientific collaboration in a highly motivated team on recent and important societal issues.

The official job offer will be announced as soon as possible. Yet, interested candidates are already invited to send a curriculum vitae, a motivation letter (including statement of planned qualification steps), (academic and working) certificates, and an example of scientific writing by Email to Sigrid Heilmann <s.heilmann@hu-berlin.de>.

It is intended to fill the position in February or March. An extension is possible. We particularly invite applications from women and from recent graduates. For further information, please consult the webpage www.resource-economics.hu-berlin.de and contact Prof. Dr. Klaus Eisenack.
