Application for, Supervision and Completion of Student Projects at the Albrecht Daniel-Thaer-Institute

- The student project is a module and can be carried out individually or as group work. Learning objectives, extent and requirements, as well as exams, can be seen in the module description or the annex of the valid exam regulations of the respective study programme.
- The topic must be covered by the spectrum of modules of the respective programme. The student may suggest a topic or pick from the offers by the departments of the institute. Any lecturer at the Faculty can be the supervisor.
- The Student Project has to be registered at the Exam Office. The Form for the Application of a Student Project has to be submitted to the Exam Office. It has to be filled completely and carry the original signature/s of the supervisor/s.
- Editing time for the project report follows exam regulations. It starts the day after registration. The deadline will be registered in the exam files.
- Edition and defence of the project must be finished before the submission (Fish Biology: before registration) of the thesis.
- The edition of the project follows the Guidelines for Theses at the Thaer Institute; the project report must include the declaration to be found within these guidelines.
- The application form and the report have to be given to the supervisor on time. The supervisor organizes the defence of the report. The defence has a duration of 30 minutes per student. In case of group projects the supervisor sets the duration per student.
- In order to make sure, that the Exam Office has registered the final title of the project, the cover sheet of the project is to submit at the Exam Office.
- The supervisor/s evaluate the project. Group reports have to show the individual achievements of the candidates, which have to be evaluated individually. In Bachelor programmes the grade is fully based on the defence, while in Master programmes the project grade results from the report and the defence, weighted 2:1.
